

## “Words” Monday:      Quiz 10.

*Well it seems quite easy to misinterpret things nowadays, or at least interpret them the way that suits you and the wonders of the English language don't always help. I'm sure you all know what a homophone is but to save you looking it up it's a word that has the same sound, but is spelled differently and has a different meaning. The clues below should all lead you to a pair of homophones.*

*For example “tree on the sandy shore” would be a beech on the beach, or “Self-raising or just a rose” would be flour and flower. **You only need the two homophones BUT they must be spelt correctly and be in the right order.***

*I hope you enjoy them – answers on Wednesday.*
